

Introduction of the new system

The new system is designed to improve the efficiency of the existing process. It will be implemented in three phases. The first phase will focus on the initial setup and training. The second phase will involve the gradual rollout of the system to different departments. The third phase will focus on monitoring and evaluating the system's performance. The new system is expected to reduce the time and cost of the process, while maintaining the quality of the output. It is a significant step forward in the organization's digital transformation journey.
